Profile Summary

Computer Science student skilled in full-stack development, agentic workflows, and deploying ML-powered systems. Experienced in building scalable applications using Python, FastAPI, React, and Flutter. Strong in integrating LLMs (Gemini), Model Context Protocol (MCP) servers, API design, and problem-solving through competitive programming.

Education

Bachelor of Technology in Computer Science & Engineering Sep 2023 – Jun 2027
College of Engineering, Trivandrum (CET)
CGPA: 8.65

CBSE Class 12 May 2022 – Mar 2023
Lakshmi Narayana Vidhyanikethan
Percentage: 94.4%

CBSE Class 10 May 2020 – May 2021
Lakshmi Narayana Vidhyanikethan
Percentage: 94.6%

Work Experience

Full Stack developer, Intern May 2026 – Present
SATCARD, IIT Palakkad

- Engineered a robust, full-stack agricultural market analytics platform using a FastAPI backend and Flutter frontend to track and visualize real-time commodity indices.
- Architected dynamic multi-level filtering and interactive data visualization charts, utilizing Riverpod for decoupled state management and ensuring seamless UI state transitions.
- Designed a highly scalable database layout integrating PostgreSQL and SQLAlchemy ORM for efficient handling of large-scale market data.

Data Science Intern Jun 2025 – Jul 2025
Proxenix

- Collaborated in a team of 5 to build and deploy a movie review sentiment analysis web app achieving 90% accuracy using TF-IDF and Logistic Regression.
- Developed the FastAPI backend for real-time inference and integrated a responsive UI using React.

Projects

- Omnichannel Anti-Fraud Agent** | *Python, Gemini 2.5, MCP, MongoDB, React* Hackathon Project
 - Developed a multimodal fraud detection system analyzing text, audio, images, and PDFs utilizing Google Cloud ADK and Vertex AI Agent Runtime.
 - Engineered a dual-layer verification pipeline by integrating Gemini's behavioral reasoning with MongoDB and Elasticsearch Model Context Protocol (MCP) servers for deterministic domain validation.

- Implemented a threat scoring framework that triggers automated Twilio SMS and SendGrid email emergency alerts for high-risk cases (score ≥ 0.8).

- **Crash Detection & SOC Dispatch System** | *Kotlin, React, Firebase, Python, TensorFlow Lite* Independent Project

- Built an end-to-end emergency response system featuring a Kotlin Android app that utilizes background sensor fusion (accelerometer/gyroscope) to detect high-G impacts.
- Trained and deployed a 1D CNN model via TensorFlow Lite for on-device crash severity prediction across 3 risk tiers with a 300ms confirmation window.
- Developed a real-time React Security Operations Center (SOC) dashboard utilizing Firebase and Google Maps API for live incident tracking and intelligent hospital routing.

- **Lab Record Studio** | *Next.js, FastAPI, Python, Gemini API, LaTeX, Render* Mar - Apr 2026
Live: record-latex-generator.onrender.com
GitHub: github.com/Navaneeth832/record_latex_generator

- Built and deployed an AI-powered full-stack application that transforms PDFs, code snippets, and natural-language prompts into structured laboratory experiments with editable LaTeX output.
- Implemented an automated document pipeline supporting 3 input methods, 2 customizable LaTeX templates, PDF previews, template management, and Overleaf-compatible ZIP exports.
- Designed a scalable FastAPI backend for asynchronous document processing and LLM-powered experiment generation, producing complete lab records in under 15 seconds and reducing manual documentation effort by approximately 80%.

Technical Skills

Languages: Python, JavaScript, TypeScript, Dart, C

Backend & Frameworks: FastAPI, Flask, Node.js, REST APIs

Frontend & Mobile: React.js, Flutter, HTML, CSS

Databases & Cloud: PostgreSQL, MySQL, MongoDB, Firebase, Elasticsearch

Tools & Technologies: Git, Linux, Model Context Protocol (MCP)

AI/ML: TensorFlow Lite, Scikit-learn, Gemini API, Agentic AI

Profiles & Achievements

GATE CS 2026: Achieved **AIR 4391**

LeetCode: Solved **150+ Solved** problems across key DSA patterns

GeeksforGeeks: Ranked in the **Top 30** in university rankings for problem-solving consistency

Certificates

Certificate of Innovation, *Google Developers Group on Campus - ADGIPS* | Adobe Certificate of Participation, *Adobe*

Data Science and Analytics Internship, *Proxenix* | Agnirirva AI Internship, *Agnirva Space Community*

Essential Mathematics for Machine Learning, *NPTEL* | Getting Started with Javascript, *Pupilfirst* |

Getting Started with Google Gemini API, *Google DeepMind*

Languages

English (Full Professional), Malayalam (Native/Bilingual), Hindi (Limited Working)
